CROSSWORD PUZZLE

Across

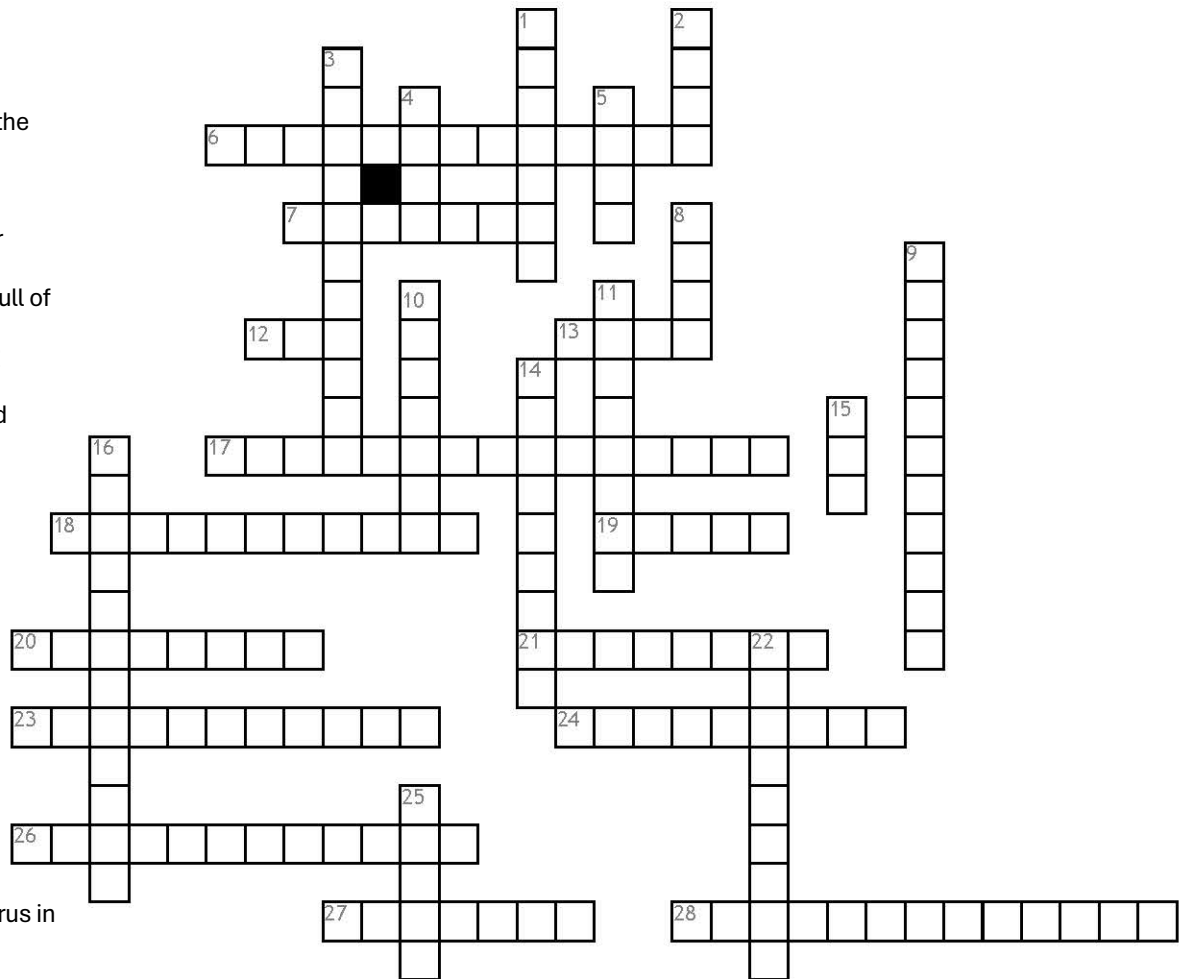

6. Tiny plastic particles found in the environment
7. Substance measured during laboratory testing
12. Abbreviation for waste-water surveillance
13. The reason your calendar is full of webinars.
17. Waterborne parasite causing diarrheal illness
18. Undesirable substance found in air, water or soil
19. Deadly virus first identified in 1976 or Virus associated with outbreaks in Central and West Africa
20. National network for detecting foodborne outbreaks
21. Discussion-based emergency preparedness exercise
23. Characterizing observable traits of an organism
24. Seasonal viral respiratory illness
26. Sequencing of all genetic material in a sample
27. Growing microorganism or virus in the laboratory
28. Agent used to kill or inhibit microorganism

Down

1. Highly contagious vaccine-preventable viral disease
2. Chemicals monitored in water samples
3. Collaboration among public health organizations
4. Home away from home for public health laboratorians
5. Laboratory Information Management System

8. Connector of Public Health Laboratories worldwide
9. Management and use of laboratory data
10. Population routinely screened for inherited disorders
11. Clinical sample used for laboratory analysis
14. Practices that protect workers from biological hazards
15. Abbreviation for whole-genome

- sequencing
16. Health issues that cross international borders
22. Human-animal-environmental health
25. Bacterium that can contaminate food or water
